Product information "Necklace rubber 1 diamond 0,10 ct W si white gold 750/- lock stainless steel"

"Light loves to play in the dark"

Thanks to the vigor of the rubber the connection is certainly guaranteed between the diamond enclosed in white gold and the soft raw material - moreover, both materials are effective equally excitingly. This new material mix which bumped in the 80s in to a lot of lack of understanding in the jewellery branch completely corresponds to a basic setting of the designer: "The question about the value of the worthless and the worthlessness of the valuable". Today after over 30 years now this jewellery collection is valid as "a classic" and is complemented regularly with new models.
