Safe-T, Lifestyle, Fire Extinguisher Louis Safe-T

When exceptional design meets the highest safety standards, it's a fiery combination – in the truest sense of the word. 29 cm tall and with a weight of 2 kg, the DNC Tag fire extinguisher Safe-T is functional and easy to handle for class A, B and C fires. After removing the safety splint, the extinguishing powder is immediately released through the brass valve in a strong jet by pressing the red lever. However, the fire extinguisher impresses in particular with the reinterpreted, fashionable design of a French luxury brand, which is carefully applied on a digitally printed vinyl film. This means that the fire extinguisher is not only a functional interior object, but is also suitable as an extraordinary gift for fashion lovers.

About Safe-T

SAFE-T fire extinguishers by DNC Tag combine functionality and sophisticated design. In compliance with strict quality criteria, the fire extinguishers are produced 100% in Belgium, as the company places priority on one rule in particular: Safe-T first! All Safe-T fire extinguishers contain 1 kg of high-quality extinguishing powder, which is refilled by the manufacturer free of charge in the case of use. While conventional fire extinguishers often disappear into the basement or inaccessible corners, Safe-T fire extinguishers possess a true design factor and are therefore positioned to be all the more accessible. With up to 70 designs in a nuanced range of colors and textiles, they can be used to lend any interior that extra something special.
